**Australasian Academy
of Facial Plastic Surgery**

Symposium and Dissection Workshop on Facial Rejuvenation & Rhinoplasty

Convenor **Tuan Pham**

PERTH
7-9 MARCH 2018

Message from the Convenor

On behalf of the Australasian Academy of Facial Plastic Surgery, I am honoured to invite you to attend our meeting on 7-9 March, in Perth, Western Australia, conveniently prior to ASOHNS Annual Scientific Meeting, also held in Perth 9-11 March.

We are honored to welcome Dr Andrew Jacono as our Keynote speaker, a Facial Plastic and Reconstructive Surgeon from Manhattan. He will share with us the latest techniques, advancements and how best to deal with the challenges in Facial Plastic Surgery.

The AAFPS Symposium & Dissection workshop will focus on Face, Eyelid and Neck Lift, and Rhinoplasty. The cadavers are fresh frozen, and should provide a more simulated and realistic operative experience.

The objectives of the meeting include:

- Providing Fundamentals of Facial Rejuvenation and Rhinoplasty
 - Contemporary techniques and concepts
 - Concise video presentations
 - Interactive and panel discussions on finesse and complicated cases
- Detailed instructional cadaver dissection for Dissectors and interactive observation for Non-Dissector Observers

March is a great time of the year in Perth with clear sunshine all day and balmy warm nights, perfect for enjoying Western Australian wines, beers and cuisine in a contemporary setting with colleagues and family. In the West we are known as laid back, however we work hard and play in even harder!

So come and enjoy our hospitality.

Again, on behalf of AAFPS and the Faculty, we look forward to seeing you in Perth.

Warmest regards

Tuan V. Pham FRACS
